

Version 1.8

Version 1.8
2016-06-12

amusewiki.org

2016-06-12

Version 1.801 (2016-04-22)

- Added help page for OPDS

Version 1.800 (2016-04-22)

- Decoupled the localization framework from the application
- Completed translations: fr and mk.
- Updated dependencies Text::Amuse and Text::Amuse::Preprocessor

The upgrade should be transparent, but please see LOCALIZATION.txt for details if you are using the `lexicon.json` file to override localization. Otherwise there is no action to take.

Version 1.826 (2016-06-12)	5
Version 1.821 (2016-05-10)	5
Version 1.811 (2016-05-01)	5
Version 1.801 (2016-04-22)	6
Version 1.800 (2016-04-22)	6

Version 1.826 (2016-06-12)

- Adjusted the statistics under `/stats/popular`
- Documentation fixes
- Improved notifications on the upload process
- Added documentation for 0-downtime upgrades
- Debian packages now come with the 0-downtime upgrade feature built-in

Version 1.821 (2016-05-10)

- Added reset password by mail (#48)
- Added admin role which is able to set most of the site settings (#49)
- Added experimental popular sorting (#44)
- Add HTTP auth for robots on private sites (#50)
- UI improvements (number of texts pending on the bookbuilder)
- Updated translations: fr, it, hr
- Updated documentation

Version 1.811 (2016-05-01)

- Decoupled mail sending from the application [INTERNAL]
- Optimized `/opds/crawlable`
- Removed `simp_le` from the stack and use `Protocol::ACME` instead (see the Let's Encrypt section of the README)
- Updated localization

If you are the `simp_le` cronjobs in place, please remove them, as the certificate renewal is already taken care of by the `amusewiki` daemon.
